VIDEO API PLATFORM

Embed Top-Notch HD Video Calls into Your Applications

inAPI

inAPI is a cloud-based SaaS video API platform, helps you to embed high-quality video calls within your applications or website for video conferencing, live streaming, group video calls, and more.

Why are Video APIs The Next Big Thing?

Video APIs provide access to server infrastructure and allow developers to integrate and add video functionalities to their products & applications without the hassle of encoding, hosting, and delivering.

The Video Meetings API Platform Developers Trust

inAPI is an enterprise-ready video meeting platform that helps developers, creators, organizations, and businesses of any size to effortlessly build branded, secure and diversifying video experiences.

How deploying inAPI (Video API Engine) can engage your users for long?

Deploying our Video call SDK makes everything possible, and enables more interactive & fun video experiences for your users to engage well with your applications.

Features

- ⊘ **Video Encryption**
- ⊘ **Minimal Latency**
- ⊘ **Video REST API**
- ⊘ **Browser Support**
- ⊘ **Highly Customizable**
- ⊘ **Quick Setup**

Integrate with Ease

Enable video calling in any of your platform with our simple to use Video API.

Maximize Your Brand

Add custom logos & backgrounds to your virtual meetings, to stimulate & maximize your brand value.

Enterprise-grade Reliability

Our inAPI video conferencing platform is secure, stable, and 100% future ready. Relish & make the most out of your video interactions with inAPI.

ICU Cart Solution

Video Conferencing carts are becoming an essential tool in ICU Intensive Care Units, providing remote access to medical specialists and enhancing doctor-patient collaboration. PeopleLink video conferencing carts come equipped with high-quality cameras and microphones, enabling clear and detailed video and audio transmission. With teleconsultation capabilities, medical specialists can remotely access patients' medical conditions and provide real-time diagnoses and treatment recommendations. This enables remote collaboration between doctors and patients, providing critical medical care and improving patient outcomes.

PeopleLink ICU Cart for Operation Theaters, Intensive Care Units, Newborn Baby Wards, Covid Wards, Reception, etc.
